Education

Chulalongkorn University

Bachelor's degree, Computer Engineering
2014 - 2017

Samsenwittayalai School

Secondary Education, Science- Maths
2008 - 2013

Interest

- AI (Machine Learning)
- Algorithm + Data Structure
- LINE Platform
- Python
- Golang

SITTHICHAJ SAEJIA

Software Development Engineer

Experience

Software Development Engineer *Jun 2018 – Present* Health at Home Co., Ltd. • Full-time

My primary responsibility is front-end web development. Throughout my experience, I have worked with various tech stacks, including jQuery, Vue.js, Alpine.js, and Svelte.js. I collaborate closely with UX/UI designers to provide input on the website's interface, ensuring usability and efficiency within limited development time. Additionally, I have some knowledge of Golang, particularly in terms of syntax, as I need to work with Go Templates, which are developed using Go—the company's primary backend development language.

Scrum Master *May 2019 – Present* Health at Home Co., Ltd. • Full-time

With a foundation in Agile methodologies, I leverage my knowledge to enhance team collaboration, eliminate obstacles, and ensure efficient product delivery. Skilled in backlog management, stakeholder communication, and Agile coaching, I am proficient in tools like Jira and other team-specific platforms. Passionate about driving continuous improvement and fostering a high-performance Agile culture.

Frontend Web Developer *Sep 2022 – Present* Moon Rhythm Co., Ltd. • Freelance

My core expertise is in Front-end development, with occasional involvement in UX/UI design across various projects. I am eager to explore new and unique experiences in this field, enhancing efficiency, performance, and testing processes. I also seek to gain diverse work experiences beyond my daily tasks and expand my knowledge beyond my primary role to continuously grow and develop my skills.

Frontend Web Developer *May 2017 - Jul 2017* Like Me Co., Ltd. • Internship

The beginning of my journey in web development, where I chose to specialize in Front-end development. I have gained hands-on experience working with a real development team, where every idea and improvement directly contributes to the company's actual projects. Additionally, I have actively participated in meetings and helped implement Agile methodologies within the team.

Web Designer *Jan 2017 - Present* Young Webmaster Camp • Participant and Staff

This camp marks the beginning of my journey into full-fledged web development, focusing on knowledge sharing and collaboration with various teams, including Developers, Marketing, and Content. Before the camp concluded, our team created a mock business under tight deadlines, followed by a pitch competition. This experience not only enhanced my skills but also provided valuable connections within the web development profession and the digital industry.
